

Slide 2

Slide notes: StorMan v8 includes an updated Dashboard design - with easier-to-see calendar dates, and a search function that directly searches the myStorMan website for knowledgebase articles, TechTips, how-to videos and much more.

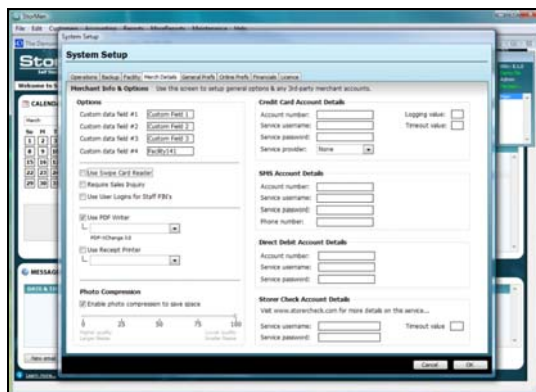

Slide 3

Slide notes: Each and every 'screen' has also been recoloured, and redesigned...

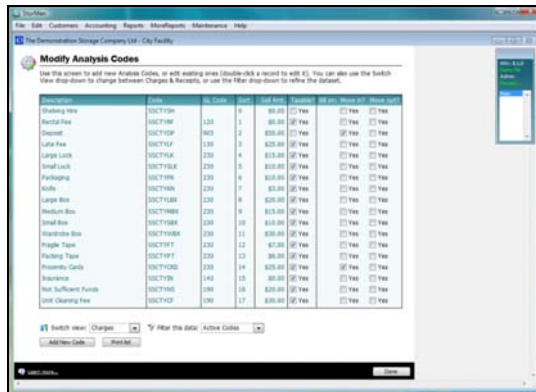

Slide 4

Slide notes: All screens now feature more white-space, to ensure that areas are clearly defined.

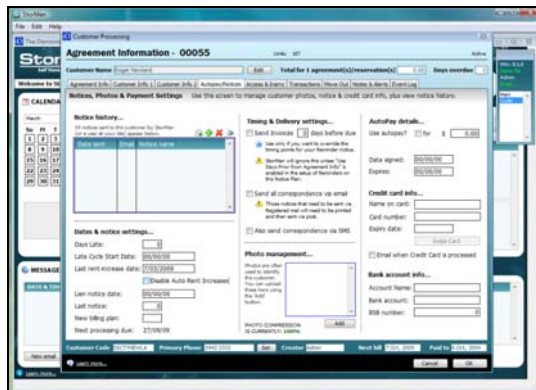

Slide 5

Slide notes: Previously cluttered and complex areas, such as the System Setup screens, have also been extended (with more tabs). This allows for a neater, cleaner user interface.

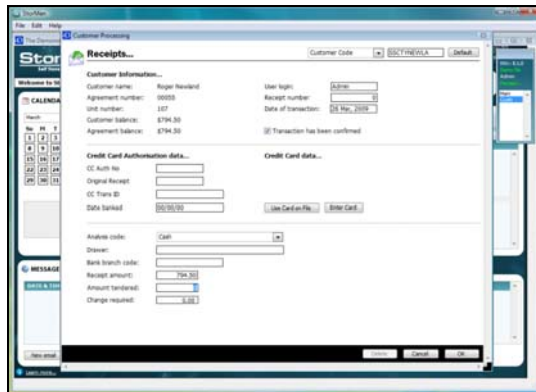

Slide 6

Slide notes: Tabular display-screens have also been redesigned & recoloured.

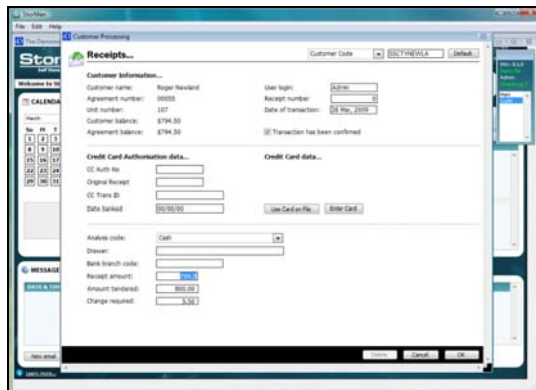

Slide 7

Slide notes: We've added heaps of new features in v8 - including the ability to disable automated rent increases on a per-agreement basis.

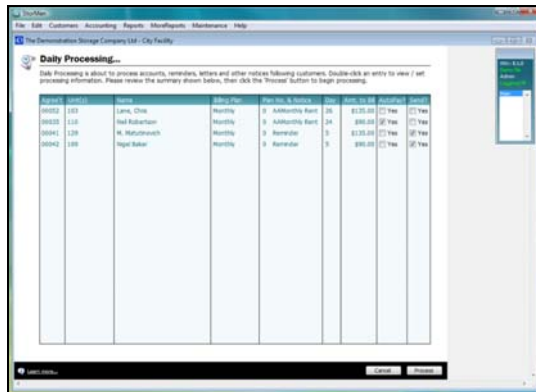

Slide 10

Slide notes: We've also added a feature where StorMan works out the change to provide to a customer - as shown here when we add a receipt. After entering an 'amount tendered' of \$800...

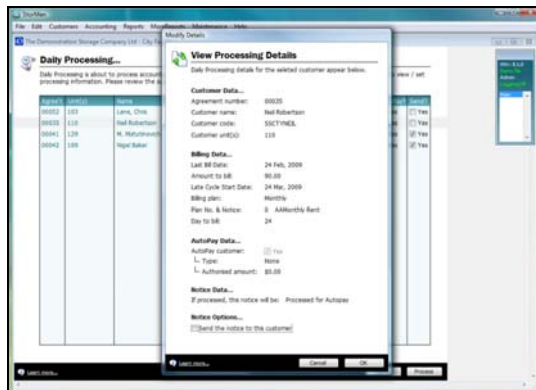

Slide 11

Slide notes: ...StorMan calculates the amount of change to give to the customer.

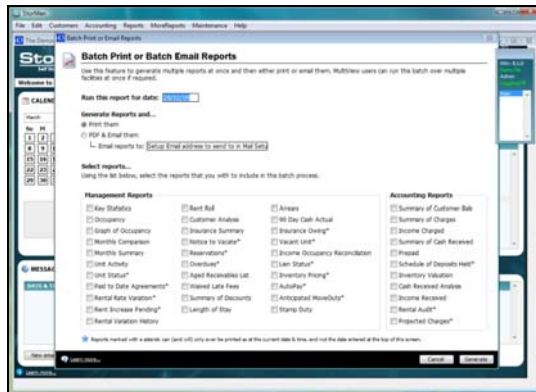

Slide 14

Slide notes: The Daily Processing screens now include much more information...

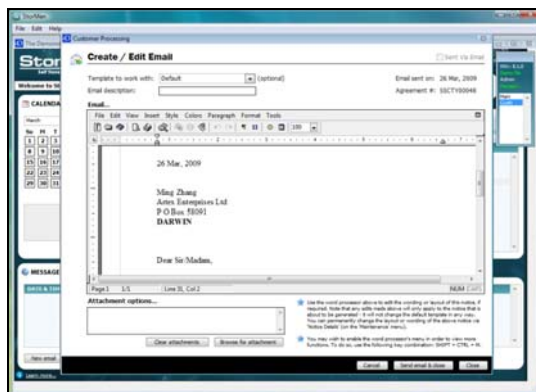

Slide 15

Slide notes: As do the processing details, when double-clicking on a customer in the Daily Processing summary.

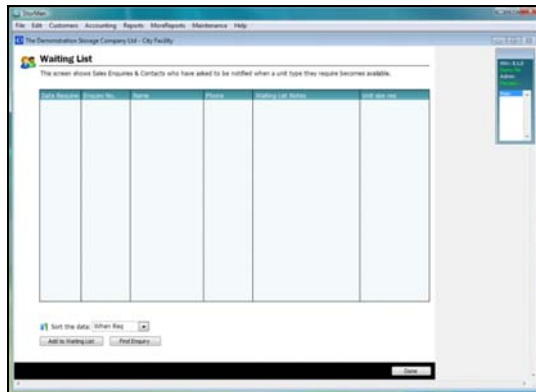

Slide 16

Slide notes: You can now also batch-print or batch-email ALL reports to an email address.

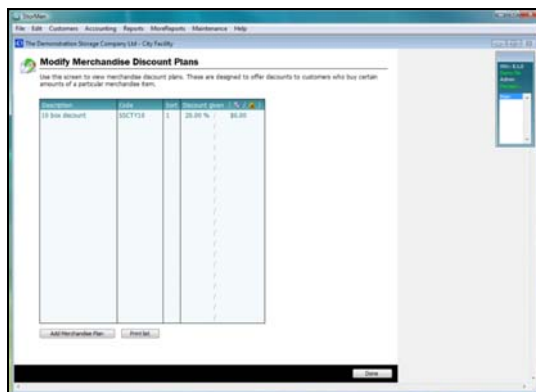

Slide 17

Slide notes: The screens for adding or editing letters and emails have also been improved and expanded.

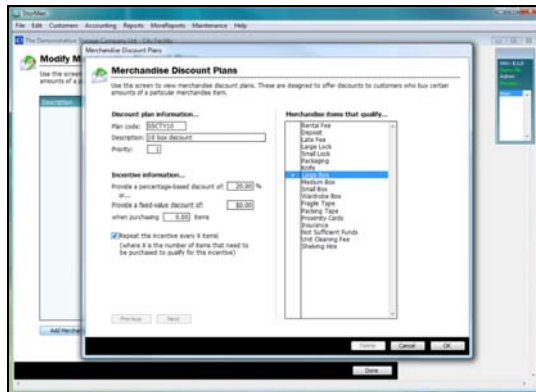

Slide 18

Slide notes: There is now a waitlist function, for Sales Enquiries to be notified when a unit type they're waiting for, has become available.

Slide 19

Slide notes: Another new feature, are Merchandise Discount Plans...

Slide 20

Slide notes: ...these allow you to provide a percentage or fixed-amount off, depending on how many items a person buys, of a particular item-type. You can even include multiple item types in a merchandise discount plan.
